### **DETAILED ACTION**

1. This office action is in response to application filed on January 12, 2001. Claims 1-23 are considered for examination.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, Load Balancing (under subclass, Task Management and Control), classified in class 718, subclass 105.
- II. Claims 18-23 drawn to Distributed or remote access (under subclass 1, Database or File Accessing) classified in class 707, subclass 10.

Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has the utility such as means or steps for scheduling multiple processes or tasks and minimizing processing execution time by efficiently distributing workload (claim 1, matching attribute, and claim 5, attribute is load capacity).

Invention II is related to means or steps for management of distributed database data and file access and retrieval (claim 18, creating a record in a database, and later updating the record), and retrieval of database data and files from a centralized or remote site. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2127

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. A shortened statutory period for reply to this office action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the date of this Office Action.
